

Academic Qualifications			
Year	Degree/Certificate	Institute	Performance
2022 – 2026	B.Tech, CSE	Dronacharya Group of Institutions, Greater Noida	72%
2021	Class XII (CBSE)	DAV Cantt Area CRRC, Gaya	88%
2019	Class X (CBSE)	DAV Medical Unit CRRC, Gaya	81%

Work Experience	
Agrasar Soft Consultancy Services, Ghaziabad Software Developer Intern	
Nov 2024 – May 2025	
Objective	Deliver a full-stack ERP platform for coaching institutes, translating stakeholder requirements into a working production system.
Approach	- Built REST APIs, an authentication system, and a relational database schema directly from stakeholder requirements. - Managed the entire release pipeline (GitHub Actions CI/CD → Ubuntu VPS, Nginx, PM2) and coordinated Git-based version control across the team.
Outcomes	Shipped a production ERP system with on-time, zero-downtime releases in a fast-paced, startup-style environment.
IBM (SkillsNetwork) Virtual Intern, Web & Mobile Development	
Jul 2025 – Aug 2025	
Objective	Build industry-standard backend API and mobile-integration skills through an IBM-certified structured program.
Outcomes	Completed the certification, covering backend API design, mobile integration patterns, and product development workflows.

Projects	
TickZen — AI-Powered Task Management SaaS (Founder & Product Owner)	
Live: tickzen.in	
- Identified the friction of manual task entry and conceived TickZen, a voice-first AI task management platform. Led the product from idea to production, designing an AI assistant (ZentrixAI) that converts natural language into actionable tasks. - Defined the product roadmap by prioritizing features such as role-based access, Kanban workflows, OTP onboarding, and secure payments, balancing user needs with technical feasibility to deliver a seamless MVP. - Owned the end-to-end product lifecycle—from requirement gathering, UX decisions, development, deployment, and production operations to continuous iteration based on early-user feedback. - Successfully onboarded 25+ active users, achieving ~80% first-pass voice recognition accuracy through prompt engineering and intelligent fallback mechanisms, improving task creation reliability while maintaining a smooth user experience.	
MedTrackFit — Health Recovery SaaS Platform (Founder & Product Lead Personal Project)	
Live: medtrackfit.in	
- Conceived MedTrackFit during the IDE Bootcamp after identifying gaps in how patients track recovery and stay engaged with their treatment plans. Led the product from idea to a live production platform. - Defined the product vision, prioritized features, and translated user needs into an MVP, expanding it into a multi-role platform for patients, mentors, doctors, and administrators based on continuous feedback. - Collaborated on the end-to-end development and launch of the platform, overseeing planning, implementation, deployment, and post-launch improvements while ensuring a smooth user experience. - Currently evolving the product with an AI-powered recovery assistant that interprets patient symptoms and recommends personalized recovery trackers to improve engagement and long-term progress.	

Aura Elysian — D2C E-Commerce Platform	
Live: auraelysian.shop	
- Built a full-stack D2C e-commerce platform (React, TypeScript, Node.js, Express, MongoDB) for premium, themed, and custom scented candles, including a custom candle personalization engine allowing customers to upload reference images and specifications for bespoke orders. - Integrated Razorpay checkout with backend signature verification, a custom image pre-caching service to improve Core Web Vitals, and a real-time multi-facet filtering system (scent, category, weight, container, festive theme, price). - Built an in-app Admin/Employee panel for order management, content updates (homepage carousels, featured collections), and a review system with photo uploads.
