

PRAKASH KUMAR

DevOps | Cloud Engineer
Noida, India • +91 9934202241 • prakashkr2894@gmail.com • [GitHub](#) • [LinkedIn](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience in CI/CD automation, Kubernetes orchestration, and cloud infrastructure. Built and deployed 4 production SaaS applications using Docker, Kubernetes, GitHub Actions, and AWS. Skilled in Infrastructure as Code, observability, and zero-downtime deployments.

TECHNICAL SKILLS

Cloud & Infra: AWS, Ubuntu VPS, Linux administration, Nginx, Bash
DevOps & CI-CD: GitHub Actions, Docker, Docker Compose, Docker Hub, Kubernetes, Helm, Terraform
Monitoring & Security: Prometheus, Grafana, Spring Security, OAuth2, JWT, RBAC, Nginx SSL/TLS,
Programming & Databases: Java, JavaScript, Python, MySQL, MongoDB
Version Control: Git, GitHub

PROFESSIONAL EXPERIENCE

Virtual Intern, Web & Mobile Development | IBM PBEL (SkillsNetwork) [\[Certificate\]](#) Jul 2025 – Aug 2025 • Remote

- Completed MERN stack training and applied Git version control, CI/CD concepts, and agile-aligned SDLC workflows through mentor-guided projects.
- Gained mentored exposure to industry-standard backend API design and enterprise-level development practices under guidance from an IBM professional.

Software Developer Intern | Agrasar Soft Consultancy Nov 2024 – May 2025 • Ghaziabad

- Engineered GitHub Actions CI/CD pipeline for a production ERP platform — automated build, test, Docker image push, and zero-downtime deployment to Ubuntu VPS on every commit, cutting deployment effort by 80%+.
- Configured Nginx reverse proxy, SSL/TLS termination, and PM2 process management on Linux server; maintained dev-to-production parity using Docker containerization across the full stack.
- Built and deployed full-stack REST APIs (15+ endpoints), JWT-based authentication, and MongoDB schema using React.js, Node.js, and MongoDB — shipped to live concurrent users.

PROJECTS

Cloud-Native Microservices Platform — Kubernetes + Istio + OPA [\[GitHub\]](#)
Docker · Kubernetes · Istio · OPA · Helm · GitHub Actions · Linux

- Architected Kubernetes microservices using Helm charts and Infrastructure as Code — version-controlled Deployments, Services, ConfigMaps, Secrets, and Ingress controllers.
- Deployed Istio service mesh with canary deployments, mTLS, circuit breaking, distributed tracing via Jaeger, and observability using Prometheus and Grafana.
- Built GitHub Actions CI/CD pipeline: build → Docker image push → Kubernetes deploy → triggered rollback on failure.

TickZen — AI-Powered Task Management SaaS [\[GitHub\]](#) / [Live: tickzen.in.net](#)
React.js · Node.js · MongoDB · Docker · GitHub Actions · Ubuntu VPS · Nginx

- Built end-to-end CI/CD pipeline with GitHub Actions — git push triggers Docker build, registry push, and zero-downtime deployment to production Linux server.
- Managed Nginx reverse proxy, SSL/TLS certificate lifecycle, and PM2 process supervision on Ubuntu VPS.

MedTrackFit — Health Recovery SaaS Platform [\[GitHub\]](#) / [Live: medtrackfit.in.net](#)
Spring Boot · MySQL · GitHub Actions · Nginx · PM2 · Ubuntu VPS · Linux

- Automated Spring Boot CI/CD pipeline with GitHub Actions — builds JAR artifacts and deploys to Ubuntu Linux with Nginx and PM2 for zero-downtime production hosting.
- Containerized the application using Docker and Docker Compose, configured Nginx as a reverse proxy with SSL, and deployed it on a self-managed Ubuntu VPS.
- Enforced OAuth2 and 4-role RBAC system (Patient, Mentor, Doctor, Recovered User) using Spring Security.

EDUCATION

B.Tech – Computer Science & Engineering 2022 – 2026
Dronacharya Group of Institutions, Greater Noida (AKTU) | 72%

Class XII (CBSE) 2021
DAV Cantt Area CRRC, Gaya | 88%

Class X (CBSE) 2019
DAV Medical Unit CRRC, Gaya | 81%
